PROFESSIONAL
EXPERIENCE

Subject Matter Expert Intern | Oct 2025 – Present
Newton School of Technology

- Assisted learners in understanding core programming concepts by providing clear explanations, examples, and step-by-step guidance.
- Collaborated with mentors and the academic team to deliver effective learning sessions and improve student engagement.
- Contributed to refining problem-solving approaches by explaining coding techniques, debugging issues, and optimizing Python solutions.

CodeQuotient | Feb 2025 – Sep 2025
Software Engineer Intern

- Assisted in developing and optimizing full-stack MERN applications, resulting in smoother performance and improved user experience across real-time projects like WhatsApp UI and Court Management System.
- Implemented new features in the CodeQuotient student portal, contributing to better functionality and reduced bugs for active users
- Supported the creation of detailed project reports and documentation for senior stakeholders

EDUCATION

Maharaja Agrasen Institute of Management and Technology | 2023–2026
Bachelor of Computer Applications in Cloud Technology and Information Technology

- GPA: 9.60
- Won Coding Hackathon Twice
- Cracked Three Internships

Govt. Model Sanskriti Sr. Sec. School, Jagadhri | 2021–2023
Higher Secondary Education, CBSE Board

- Percentage: 86.6

St. Thomas School, Jagadhri | 2008–2021
Secondary Education, ICSE Board

- Percentage: 94.6

CERTIFICATES

JavaScript Intermediate

Certification Id: 040DDE213AAF

Python Certification

Udemy
Certification Id: UC-7647ecb4-88b7-4a62-b5d7-3424cdca675e

PROJECTS

WhatsApp Clone – MERN STACK PROJECT

- Developed and optimized a full-featured WhatsApp clone using the MERN stack, implementing real-time messaging, online/offline status, chat lists, notifications, and media sharing to closely replicate the original app experience (excluding group chat).
- Built and integrated key features such as user authentication, message timestamps, read receipts, and responsive UI components, resulting in a smooth and intuitive chat experience.
- Utilized the MERN stack along with Socket.io to enable real-time bidirectional communication, ensuring fast, reliable, and seamless messaging across the application.

Court Management Application – MERN STACK PROJECT

- Built a digital court document management system with secure user authentication and authorization, enabling role-based access for judges, lawyers, and staff.
- Implemented digital document signing, upload workflows, and email notifications to streamline case handling and improve communication across the system.
- Integrated MongoDB for scalable data storage and used Redis caching to deliver real-time updates, improving system responsiveness and reducing data-fetch latency.

SKILLS

- ◆ C
- ◆ Java
- ◆ Python
- ◆ JavaScript
- ◆ HTML,CSS,BootStrap
- ◆ Node.Js , Express.Js , React.Js
- ◆ SQL,MongoDB
- ◆ MS PowerPoint , MS Excel , Ms Word
- ◆ Problem Solving
